## Project Description

PS 131 comprises two buildings-- one was built in 1901, the other in 1937. 12 of the 14 bathrooms in these buildings are original and have never been renovated. The school serves working-class families of District 39 who depend on our schools to maintain a healthy and safe environment for their children, particularly in the COVID era. Your vote would go towards funding the renovation of up to four of the bathrooms at PS 131.
