

## KENSINGTON COMMUNITY & STREET TREES

Kensington needs more trees! New trees would provide the neighborhood with shade, beautification, better air quality, and opportunities for education and engagement with tree care.

<b>Cost</b>	\$7,000
<b>Location</b>	Kensington
<b>Project Partner</b>	NY Tree Consortium

### Who Benefits

Residents and visitors of Kensington

### Project Description

Help us get 10 new community trees and 2 new street trees in Kensington, where there are fewer trees than in other areas in our district. Community trees are planted in containers and live on public property like in front of schools, libraries, and in parks. Street trees will be planted in existing tree beds. With climate change and continued need for community engagement, planting trees is an important aspect of city life.
